About Us:

Yas International Campus Institute (YICI) began its activities in 2017 after receiving an official license from the Office of Company and Non-Commercial Institute Registration in Iran.

YICI operates independently with an international perspective focusing on short-term professional and skill-based training for physicians, nurses, dentists, and other healthcare professionals.

Through collaboration with reputable Iranian and international organizations and educational centers, we strive to create a professional platform for updating the knowledge and specialized skills of the healthcare community.

Our Mission:

To provide scientific, practical, and innovative education aimed at:

- Enhancing the professional knowledge and skills of healthcare personnel
- Promoting health literacy within the community
- Contributing to the improvement of healthcare quality and overall public health

Our ultimate goal is to improve quality of life, prevent diseases and reduce their complications

Key Objectives :

- Enhance the scientific and practical competencies of physicians nurses, and other health professionals
- Improve public health literacy regarding lifestyle modification and disease prevention
- Strengthen the scientific and managerial capabilities of health policymakers in various countries
- Build international educational and communication bridges for knowledge and experience exchange

Fields of Activity :

- Organizing professional and skill enhancement courses and workshops for healthcare workers
- Conducting Continuing Medical Education (CME) programs
- Holding public seminars and educational programs on healthy lifestyles including nutrition, exercise, social relationships, and personal hygiene etc.
- Implementing vocational health-oriented training programs to prepare auxiliary healthcare staff such as: medical office assistant, pharmacy assistants, dental assistants, nurse assistant, elderly caregivers and home caregivers
- Offering management courses for health policymakers, including : Healthcare MBA, Hospital Management, Strategic Management, Crisis Management, Stress Management, General Management etc.

Educational Methods :

In-person education (classes, workshops, seminars, and conferences)

- Online training through dedicated virtual platforms
- Practical training in partner hospitals and clinics
- Simulation-based training in advanced and fully equipped skill labs
- Final evaluation both in-person and online
- Access to offline content through educational applications

Our Partners :

YICI proudly collaborates with a range of academic centers, scientific organizations, and educational institutions both domestic and international to deliver the highest educational standards in the field of health.

- International Center for Personalized Medicine(ICPM), Düsseldorf Germany
- Appleton University, Spain
- Islamic Nations Specialists and Consultants Organization (INSCO)
- Avicenna International College, Georgia
- P7 Academy, Germany
- Learnix Academy, Georgia
- Iranian Scientific Association for Medical Education
- Technical and Vocational Training Organization of Iran
- Islamic Azad University of Iran
- Faculty of Dentistry, Islamic Azad University, Isfahan Branch

Our Vision:

To be a pioneer in the development of modern health education at both national and international levels with the aim of empowering human resources, improving community health, and creating a healthier future for all.

MASTER DEGREE IN EUROPE

AESTHETIC AND REGENERATIVE MEDICINE

Goals:

Offer the student specific training and master degree in the field of Aesthetic Medicine.

COMPETENCIES

Enable learning on specific topics that show all the techniques, therapies and treatments applicable in the field of Aesthetic Medicine, including aspects related to Aesthetic Medicine of the Skin, Alterations of the Body Contour, Interventional Techniques in Aesthetic Medicine, Diagnostic Techniques, Mesotherapy, Phleboesthetics and Lymphatic Pathology, Endocrinology, Anti-Aging Medicine, Nutrition, Health Promotion, Cosmetology, Lifestyle Habits, Cellular Regeneration Therapies, Hyaluronic Acid and/or platelet-rich plasma, etc...

Acquire the knowledge necessary to diagnose, indicate and treat patients in a medicine and aesthetic surgery consultation.

RECIPIENTS

Graduates in Medicine.

TEACHING LOAD AND AMOUNT

60 ECTS (Credits)

1500 hours virtual + 200 hours of in- person study(Practical)

METHODOLOGY

SEMI-PRESENTIAL Modality in any part of the world

دوره آموزشی C.C.U

※ آشنایی با CCU و استانداردهای آن

※ روش خواندن الکتروکاردیوگرام

※ دیس ریتمی های دهلیزی، دیس ریتمی های سینوسی

※ اختلالات ریتم، جانکشن و بطنی و الکتروولتی

※ پیس میکر ها، بلوک های قلبی، هیپر تروفی ها

※ روش های تشخیصی، در بیماری های ایسکمیک قلبی

※ روش های درمانی در آنژین صدری و بیماری های

عروق کرونر (آنژین صدری)

STEMI علائم بالینی و

تشخیصی انفارکتوس میوکارد و عوارض

※ پایش غیر تهاجمی بیمار در CCU

※ طبقه بندی داروهای آنتی آریتمی و داروهای قلبی

※ معاینات بیمار در CCU

HOSPITAL AND HEALTH ORGANIZATION MANAGEMENT COURSE

Course introduction:

According to the expansion of the activities of health service providers, it is necessary to learn the knowledge and skills of managing. Hospital managers at different levels play the greatest role in the success of the organization, so their knowledge and skills will lead to faster achievement of health-oriented goals.

Course type:

Professional

Course duration:

75 hours, 5 hours daily.

Venue:

Sulaimani, Health Awareness and Education Center Hall

Course language:

English and Kurdish (Sorani)

General Characteristics of the participants:

Minimum education degree: Managers of

different levels of the hospital and health care organization

Trainer course:

There are 3 main national and international trainer

- Assistant professor
- Ph.D. in Hospital Management
- Master in health services management

The main objective:

Increasing knowledge, improving the attitude and skills of managers of different levels in the field of hospital management and leadership in order to increase productivity in providing health services in the health centers.

سرفصل های آموزشی

- اصول و اهداف مدیریت پرستاری
- تاریخچه - کارایی و بهره وری در سازمان های پرستاری
- چالش های پرستاری - فرایند حل مسئله و تصمیم گیری
- برنامه ریزی استراتژیک و عملیاتی در پرستاری
- سازماندهی - روش های تقسیم کار در پرستاری
- اصول تصمیم گیری - اختیار در مدیریت
- جمع بندی و ارتباطات سازماندهی
- قدرت و رهبری در بخش های بالینی
- نظارت و کنترل خدمات پرستاری
- مدیریت دانش و فناوری اطلاعات
- مدیریت تغییرات در پرستاری
- مدیریت زمان، بهبود و تغییر در رفتار درمانی
- مدیریت رفتار کارکنان و انضباط کارکنان
- اعتباربخشی و مدیریت بالینی
- انگیزش و روش های ارتقاء آموزش کارکنان پرستاری
- مدیریت منابع انسانی و بهسازی نیروی انسانی
- روش های برآورد نیروی انسانی در پرستاری
- سیستم های FNC و HIS - تحول در مدیریت اطلاعات پزشکی

The Advanced Acupuncture and Moxibustion

NURSING THE ELDERLY TRAINING COURSES

Nursing the elderly training courses:

Elderly care is one of the difficult issues that the elderly and those who serve him suffer from alike, especially if the elderly suffers from complex health problems such as stroke, paralysis, cerebral palsy or stroke. These problems can be reduced by entering specialized training courses in the field of elderly care and how to provide health services in a professional manner to patients, whether in the hospital or at home. This specialized training course can help the individual and the health institution in this field.

Educational goals: Helping the elderly

Acquired skills after the course:

- Providing basic resuscitation services
- Applying methods of maintaining the health of the elderly caregiver
- Providing simple massages and exercise suitable for the elderly
- Providing education to the elderly about solving physical problems And.

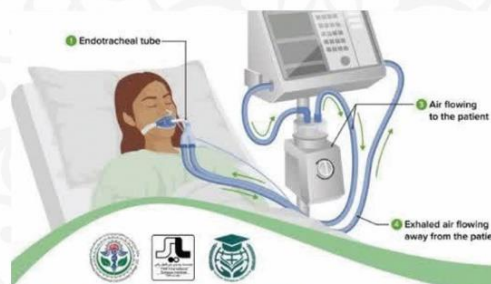

Categories benefiting from the course:

- Private sectors
- Public sectors
- Nurses
- Clinics
- Physiotherapy centers

Nursing The Elderly

The Basic Acupuncture And Moxibustion

TRAINING COURSE OF MECHANICAL VENTILATION

Ventilators are commonly used in intensive care units, operating rooms, surgery wards and emergency departments. This device are used as a breathing aid system for patients with respiratory failure or respiratory muscle weakness. Using this device requires a lot of knowledge and skills in doctors and nurses. In this training course, practical tips and principles of correct use of ventilators are discussed. According to the Johns Hopkins Bloomberg School of Public Health estimates that approximately 62,000 are full-featured ventilators owned by hospitals. Of those, about 29,000 can be used for pediatric and neonatal patients. An additional 96,000 ventilators do not have full features but can serve basic functions in an emergency.

The objectives of this training course:

- Be familiar with the basic principles and concepts regarding usage and regulations of ventilation.
- Patient assessment and care before, during and after the ventilation.

After completing this course, participants will be able to:

- General Physician (G.P.)
- People who has certificate in this field.

Educational contents:

- Prepare the patient for mechanical ventilation.
- Perform the initial settings of the mechanical ventilation device.
- Evaluate patients who need to use mechanical ventilation.
- Take proper care of the patient during mechanical ventilation.
- Properly separate patients from mechanical ventilation.
- Take proper care of the patient after mechanical ventilation.
- Pay attention to the complications caused by mechanical ventilation and manage them if they occur.

Who can participate in this training course:

- Physicians and nurses working in ICU.
- Surgery wards.

emergency department,

operating room and

ICU.

Language of the training: English

Type of the training: face to face

Duration of the course: 60 hour training course

Educational contents:

- Definitions and necessary concepts on ventilation
- Clinical indications
- Types of ventilators
- Primary regulations of ventilators
- Ventilation modes
- Investigation and assessment of the patients under ventilation; and interpretation of ABG with many other topics.
